

SEIF EDDINE BEN ACHOUR

Full-Stack Developer

Bouargoub, Nabeul, Tunisia | seifbenachour.te@gmail.com | +216 95 273 413 | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

About Me

Computer Science graduate specialized in modern web development, with solid hands-on experience in Next.js, React, TypeScript, and full-stack development. Skilled at designing performant, responsive, and maintainable applications, with close attention to architecture, security, and best practices. Curious, self-driven, and detail-oriented when solving technical problems.

Education

Institut Supérieur d'Informatique de Mahdia | Bachelor's Degree, Computer Science
Lycée Bouargoub | Baccalaureate, Computer Science

Sep 2023 – 2026
Jun 2023

Skills

- Languages JavaScript, TypeScript, Python
- Frameworks Next.js, React, React Native, Tailwind CSS, Express.js, Flask
- Databases PostgreSQL, MongoDB, MySQL, SQLite
- Tools & Technologies Git, GitHub, Prisma, NextAuth, Redux Toolkit

Projects

Online Personal Agenda [GitHub](#)

- Built a complete event-management web application from the ground up.
- Secure authentication with **NextAuth**.
- Full user journey: sign-up, login, event creation/edit/delete, category management, dashboard, and transactional emails.
- Database modeling and secured API routes built with **Prisma and PostgreSQL**.

Stack: Next.js, TypeScript, Prisma, PostgreSQL, NextAuth

AI Flashcards [GitHub](#)

- Developed a SaaS-style educational flashcard application.
- Integrated **artificial intelligence** for automatic generation of learning content.
- Multi-language support and an admin interface for category management.
- Optimized user experience with a fully responsive design.

Stack: Next.js, Tailwind CSS, AI APIs

QR Code Generator [GitHub](#)

- Built a web application for **generating, scanning, customizing, and sharing** QR codes.
- Advanced customization via **Canvas API** (logos, colors, visual styles).
- QR code history saved with **IndexedDB / localStorage**.
- Application optimized for performance and responsive design.

Stack: Next.js, Tailwind CSS, Canvas API, Lucide React

MobileShop Expo [GitHub](#)

- Built a mobile e-commerce application with **React Native and Expo**.
- Multi-screen navigation (product list, details, cart) via React Navigation.
- Global state management with **Redux Toolkit** (products, cart, quantities, totals).
- Mobile-first interface, accessibility basics, and groundwork for internationalization.

Stack: React Native, Expo, Redux Toolkit
